

Chris understands that some pick up on things easier than others and takes plenty of time to cover topics. It is also nice that Chris is always in contact w/ the coordinator to make sur we know everything for the test.

I thought the instructor did a wonderful job teaching this class. He made himself available for questions outside of class as much as possible. I think he really cared about his students. I would definately recomend this teacher to anyone considering taking math 1300. Excellent Job!

I thought it was a great course, very well taught. Chris always came in prepared, ready to answer any questions we had. He was always available whenever we needed him. Always spoke clearly and audibly.

Chris was an excellent instructor who seemed very knowledgable of all the topics and taught all of the topic very clearly as well. He presented everything clearly and organized and made everything easy to understand. I would gladly chose another math course if Chris was the T.A.

I think that Chris managed to come to class with good examples that kept me interested and helped with questions that students had. He seemed to be attempting to help students whenever possible and he always gave 100%.

Very good, the best math instructor I have had yet. Very clear and down to earth explanation of material.

He is a great teacher. He is always available to the students when they need help & readily answers questions. His concern for our success in the class is quite evident.

I really liked the instructor's techniques. I liked how he always taught by example. I also liked having an instructor who knew my name! He was also prompt in answering email and handing back tests/assignments. Thanks Chris!

He strives to help every student understand the material and always makes time for individual help. He is the best math professor I've had in the last few years.

He is interested and committed to what he teaches. He gives well thought out examples, and explains the topics clearly.

Very organized, makes it easy to learn.

Very understanding & fair instructor.

Great teaching style, very easy to follow and understand. Very willing to help in and out of class.

Solid teacher and was extremely willing to help. If it hadn't been for him going out of his way, my grade would have been much lower.

Seems really concerned his students understand the material & do well.

Easily the best instructor I had all semester. Acutally seemed like he cared if we did well and understood the material. Was upbeat everyday in class and always answered questions. Went out of his way for us.

Best Math Instructor I've had- very clear, always available, moves at good pace.

Good teacher and tries really hard to be open to questions from students.

Makes students feel very comfortable. Always willing to help students. Gives the impression that he is there

to teach and help students learn, not dictate and revel in their failure:)
