I really enjoyed the examples that Chris presented in class. Instead of using your typical examples, he used items that interested the class such as sports. I think that displayed his love for teaching, because he wanted kids to be interested and realize how the math can be applicable to real life. Another thing that I liked about Chris was his desire to help anybody out in any way he could so students could understand the material. (office hours—A+) To be honest Chris is one of the best math teachers I've ever had.

He was a really good teacher and always willing to help students when they had a problem.

Great job explaining topics. Always willing to give extra help. Great job of preparing students for tests.

He is the best I have ever had. He is very clear and helpful. He seems to want as many students as possible to get good grades.

Good explanation of course material. Lots of examples are good too. From what I've heard about other section teachers you are probably one of the best. Keep up the good work.

I really like the interaction the teacher has with the students through WebCt. It would be nice to get periodic emails giving an approximate grade for the class.

This has by far been the most helpful Math class I have taken. You present material in a way I could comprehend. Thanks.

Chris was a great instructor. Taking math is never easy, but thanks to him, class was good, and I'm satisfied with my grade. Continue your teaching technique.

Did a great job presenting all the material. Always willing to help a student made it enjoyable to come to class. Probably one of the best instructors I will have in college.

I really liked using the WebCT for this class it was helpful to hear problems other students had and be able to write our own problems as well.

Chris has been a great instructor he is very easy to understand and his examples used in class are always helpful for the homework, exams, and quizzes. I don't think he could do anything to make this course any better!

He was always very organized and respectable. Only bad point is that he's a Kansas fan.

I thought you did a really good job of teaching and you made examples of the material interesting you are a very fair grader as well.

Honestly, best teacher I've ever had. Great use of examples. Good speed through examples. Great grader. Love this class. Thanks.
