

I like Chris. He's friendly and wants us to succeed. He understands that this is a business class, and hopefully he is generous giving out grades (business students must get C- or better!).

I really like the way you teach. Your teaching style is easy to understand. Chris did a good job teaching this course. Thank you!

Chris is a very good teacher. he knows what he's talking about, and cares very much how well we do. He's always available to help. Maybe do less examples involving sports.

Out of all my math courses that I have taken so far, Chris is the most effective teacher I've had. He has great teaching techniques as well as good examples that students can relate to. He is also very helpful during his office hours and if he teaches any other math courses, I would like to have him as a teacher again.

Great teacher. I wish I had him for other math classes.

Very well prepared and organized—comfortable and confident in front of class—spoke clearly and well—had respect from students—offered a lot of office hours/very available to help students—reasonable with excuses and problems—very good.

Awesome TA. Very unbiased to his students and is always willing to give up his time to help them out with any of their work.

By far, Chris has been the best math instructor I have ever had. He makes math seem alot easier due to his great teaching abilities. Overall one of the best teachers I have ever had.

Very helpful. Easily Available. Fair Grader.

Made understanding of topics very easy. I felt confident each test. Very good teacher.

Chris was very helpful outside of class. His office hours were very flexible.

Chris has been one of the best math instructors I have ever had and I hate math but he made it somewhat enjoyable!

Works well with students. Offers a great amount of extra help options.

Easy to approach. Always there to help.

Chris takes plenty of time to make sure students understand the topics and examples. Great teacher!

Overall a very good instructor.

Chris is da bomb!

Great job, I had a great time except for that curveball we got on test 2, #1. Keep doing what you do.

I thoroughly enjoyed this class and your teaching. I'm not sure if I have ever had a better math teacher.

Thanks so much!

Very organized for students to take notes. Always available for help. Good overall character. Knows how to explain in a way for students to understand.

I used to get A's in math until Jr. year of H.S. This was the first time in 3 years that I have enjoyed a math class and it is because of Chris. I see him every week and he is so helpful and easy to understand. I had a foreign teacher last semester and this semester was so much better. Chris just uses examples that are relatable to our lives and is always easy to get a hold of and meet with! Thank you very much! I finally wasn't worried about this being my worst class.
